

Abstract

A retaining member in plastic, suited for retaining at least one line on a support (45), comprising:

- a basic body (2) with a mounting area (3) for mounting on the support (45) and at least one retaining area (9, 10) with at least one line seating (23 to 26) for at least one line, and
- a line seating (23 to 26) which, at the inside, has a plurality of resilient ribs (32 to 34) which project beyond the inside at different overhangs.
